

Service Agreement — SLA terms

Acme Industries sp. z o.o., ul. Kwiatowa 7, 61-001 Poznań · NIP 7792451234 · schedule 3 to the framework agreement · version 2026.1

1. Subject and scope

This agreement covers warranty and post-warranty service for the warehouse equipment supplied by Acme Industries: racking structures, warehouse trucks and accessories. Equipment from other manufacturers is not covered.

Tickets are accepted through the service portal and by telephone on +48 61 245 18 00. Every ticket is given a reference in the form SRV/YYYY/NNNN.

2. Ticket priorities and response times

Priority	Definition	Response time	Time to fix	Service window
P1 — critical	warehouse standstill, racking taken out of service, or a safety hazard	4 hours	24 hours	24/7
P2 — major	reduced equipment function with no safety risk	8 working hours	3 working days	Mon–Fri 7:00–19:00
P3 — minor	cosmetic fault, normal wear, or a technical question	2 working days	10 working days	Mon–Fri 7:00–19:00

The response time runs from the moment the ticket is registered in the service portal. The time to fix excludes any wait for spare parts ordered in, provided the Supplier told the Customer within 24 hours of diagnosis.

The Customer sets the priority. The Supplier may lower it only with the Customer’s written consent; a ticket concerning structural safety always stays at P1.

3. Liquidated damages and availability

Breach	Liquidated damages	Cap
P1 response time exceeded	PLN 200 for each hour started	10% of the annual service fee
P1 time to fix exceeded	PLN 500 for each day started	10% of the annual service fee
P2 response time exceeded	PLN 100 for each working hour started	10% of the annual service fee
Availability below 99.0% in a quarter	5% of the quarterly service fee for each 0.1 percentage point started	10% of the annual service fee

Service availability is reported quarterly against a contractual target of 99.0%. The Supplier delivers the availability report by the 10th day of the month following the end of the quarter.

4. Service fee

The annual service fee is 3.2% of the net value of the equipment covered, and no less than PLN 8,400 net per year. It is invoiced quarterly in advance, in equal instalments, on 30-day payment terms.

The fee covers ticket handling, diagnosis, labour and the engineer's travel. It does not cover spare parts, which are charged at the service price list with a 15% discount for parties to this agreement.

5. Periodic inspections

Racking structures are inspected every 12 months in accordance with PN-EN 15635. Each inspection produces a report classifying damage on a green–amber–red scale. An item classified red must be taken out of service immediately and replaced within 5 working days.

A missed inspection voids the warranty on the structure and suspends the Supplier's liquidated damages until the inspection has been carried out.

6. Exclusions

- damage from loading a structure beyond the capacity stated on its product card,
- the consequences of a forklift collision not reported within 24 hours,
- modifications made to a structure without the Supplier's written consent,
- consumables: batteries, rollers, seals and lighting,
- force majeure: fire, flooding, and power surges.

7. Term

The service agreement runs for 12 months and renews automatically for a further 12 months unless either party gives notice not to renew 60 days before the end of the term.
